Hjortebjerg A/S

During the last 30 years, the production of pot-plants has been in focus by Hjortebjerg A/S. Today the production has spread to many different cultures and thus the production has adapted to the demand from costumers and the markets ability to pay.

Hjortebjerg A/S is flexible, adaptable, trend- and seasonally oriented in relation to demand from wholesalers and retail chains. A green image with our own energy efficient electricity- and heat-production, combined with focus on minimizing particle- and CO2-emission, is very important for the sale of pot-plants. Therefore the products from Hjortebjerg A/S are produced with minimum energy consumption and environmental impact, benefiting the wholesalers and retail chains marketing to the end users.
